GEOGRAPHY COURSES

GEO 001 Introduction to Physical Geography (3.0 Lecture) 3.0 UNITS

This course examines the interactions among weather and climate, water resources, landforms, and living things. Human impact on all aspects of the physical environment and use of geospatial technology are explored.

GEO 002 Introduction to Cultural Geography (3.0 Lecture) 3.0 UNITS

This course examines human interactions with the natural environment and how the interactions shape the cultural landscape. Its focus is on describing and analyzing how and why population distribution, migration/mobility, languages, religions, folk/popular cultures, political systems, and economic activities vary from place to place.

GEO 006 World Regional Geography (3.0 Lecture) 3.0 UNITS

World Regional Geography deals with the study of a particular group of world regions or realms as each compares with the rest of the world in terms of both physical and cultural landscapes. It uses the fundamental geographic concepts and themes to provide a framework for understanding development patterns around the world. Development is viewed from the perspective of the natural environment that provides the basis for development as well as the cultural, social, political, and the economic factors that vary from region to region.
